NAMIG ABILOV

SUMMARY

Dedicated to the Backend Developer who deeply learns .Net and .Net frameworks, works with Docker and Cross-Platforms

EXPERIENCE

Back End Developer, 01/2022 – Current
MatchX – Baku, Azerbaijan
- I contributed as a Founder to the success of MatchX, dedicating two years to its development.
- Created Matchx.az BAckend With N-Tier architecture in .Net 8.0 and at the same time, the Api has been upgraded to the most dynamic one for the fast operation of the program
- During this time, I led the MatchX team and brought our Project to the most perfect state

Back End Developer 10/2023 – 05/2024
AzFresh Dagitim – Baku, Azerbaijan, Remote
- Developed a robust .Net API application for the AzFresh Dashboard, featuring role-based access controls.
- AzFresh has developed several different roles tailored to the needs of different individuals: one for the AzFresh CEO and employees, and another specifically for salespeople.
- If the CEO wanted, he could get all the documents in .xlsx format, processed with big data. Distribution company of the supermarket chain.
- With the help of added artificial intelligence, the waste of products has been reduced to a minimum
